TASK-5

❖ ***PART-A : Case Study (Cybercrime: UPI/Online Payment Fraud)***

❖ **Case Study: UPI Payment Fraud**

UPI/Online Payment Fraud is a rapidly growing cybercrime in India where fraudsters trick users into authorizing payments or sharing sensitive banking details. This crime typically begins with the attacker contacting the victim via phone, SMS, or messaging apps, often pretending to be a bank official, delivery agent, or customer support executive.

Step-by-step, the fraud occurs as follows: First, the victim is lured with a believable scenario (e.g., refund, prize, or urgent account issue). Second, the attacker sends a malicious payment request or a fake link. Third, the victim is instructed to enter their UPI PIN or click on the link, believing they are receiving money. In reality, they are authorizing a payment. Once the PIN is entered, money is instantly transferred to the fraudster's account.

College students and young adults are frequent targets because they actively use digital payments and may lack awareness of such scams. The consequences include financial loss, emotional stress, and potential misuse of personal data for further fraud.

Such incidents highlight the importance of digital awareness and careful handling of financial transactions. Victims often find it difficult to recover funds due to the instant nature of UPI transfers, making prevention the most effective defense.

❖ ***PART-B : Stay Safe Online: Prevention Checklist***

➢ ***General Safety Tips***

- ***Never share your UPI PIN, OTP, or bank details with anyone.***
- ***Do not click on unknown links received via SMS, email, or WhatsApp.***
- ***Verify the identity of callers claiming to be from banks or companies.***
- ***Use official apps only—avoid downloading apps from unknown sources.***
- ***Enable two-factor authentication on all financial and social accounts.***

- ***Regularly update your phone and apps for security patches.***

➢ ***UPI/Financial Safety Tips (Specific Requirement)***

- ***Remember: You do NOT need a PIN to receive money—only to send it.***
- ***Always check payment requests carefully before approving them.***

➢ ***Reporting Channels***

- ***Report fraud at: https://cybercrime.gov.in***
- ***Call Cyber Crime Helpline: 1930 immediately***
